

## Pursuit X3

**Pursuit X3 is designed for hard work and for extremely dirty working conditions. The model can be modified for special requirements, such as for rescue or surface rescue tasks, or for heavy helmet diving.**

Despite of it's durability all the ergonomic features that improves working comfort has been taken into account.

Instead of traditional neoprene hood the suit is also available with collar that can be used with diving helmet and instead of neoprene boots the suit is available with PU-working boots with a steel reinforcement.

The suit is even more long-lasting thanks to the back zipper with zip cover and thanks to integrated suspenders the suit is even more comfortable.

As a special equipment for surface rescue operators and rescue divers the suit is available with integrated inflatable buoyancy vest. As a additional equipment also available with integrated loops that helps and fasters dressing in narrow spaces like fire trucks.

## Technical Details

- PU back zipper with zip cover
- Seam structure: seamless high frequenz welding
